CAREER OBJECTIVES

Motivated postgraduate student in AI/ML with strong academic and research background, seeking a teaching position to contribute to student learning and academic development.

TECHNICAL SKILLS

Languages & Databases: C, C++, Python, Java, JavaScript, HTML, CSS, SQL, R

AI/ML Frameworks: TensorFlow, PyTorch, Scikit-learn, Transformers, Pandas, NumPy

Tools & Platforms: Git, IntelliJ IDEA, Streamlit, Flask, MATLAB, Linux, ROS, Arduino

Teaching Interests: AI, Machine Learning, Data Structures, Python, Deep Learning

EDUCATION

MTech in Computer Science and Engineering(AI/ML) | Rajagiri School of Engineering and Technology

CGPA - 9.71 (Aug 2024 - May 2026)

BTech (Honours) in Robotics and Automation | Adi Shankara Institute of Engineering and Technology

CGPA - 9.54 (Oct 2020 - Jun 2024)

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Mastermine Technologies

Aug 2025 - May 2026

Contributing to a full-stack, cross-platform desktop application by developing Java-based backend services.

Teaching Assistant (Part-time), Rajagiri School of Engineering & Technology

Dec 2025 - Mar 2026

Assisted in lab sessions, evaluated student work, and guided UG students in programming and AI/ML concepts.

Hardware Systems Intern, Sunlux Technovations

Feb 2024 - April 2024

Contributed to a government aided and funded project for the navy submarine's. central control

PUBLICATIONS

- S. Krishnan, M. Karuppasamypanthiyan, and A. Manoj, "A Hybrid Transformer Model Approach for Precision Weed Detection," in 2025 4th International Conference on Advances in Computing, Communication, Embedded and Secure Systems (ACCESS), Ernakulam, India, 2025, pp. 1-7, doi: 10.1109/ACCESS65134.2025.11135583.

PROJECTS

Health Mind AI - Multi-Modal Clinical AI Platform

Developed Health Mind AI, a privacy-first, multi-modal diagnostic platform built on Next.js and FastAPI that leverages local on-device AI and zero-knowledge encryption to deliver clinical-grade medical screenings and secure health monitoring across 11+ clinical specialties.

Multimodal Graph Learning for Early Classification of Alzheimer's Disease

Engineered a novel deep learning architecture for early Alzheimer's diagnosis, integrating multimodal data and graph learning techniques to accurately classify CN, MCI, and AD subjects.

Multilingual News Audio Translator

Developed a full-stack audio translation app using Wav2Vec 2.0 for speech recognition (92% accuracy) and an mBART model, fine-tuned with reinforcement learning for fluent translation.

Automatic Weed Detection and Spraying Robot

Revolutionizing precision agriculture with an AI-powered weed detection robot using ROS and a custom hybrid EfficientNetV2 - Transformer models (97% Accuracy) for an eco-friendly herbicide application.

ADDITIONAL INFORMATION

- Certifications:** Infosys (Prompt Engineering), Coursera (Google Data Analytics, GenAI for UX Designers)
- Soft Skills:** Communication, Critical and Creative Thinking, Time Management
- Languages:** English, Malayalam, Tamil, Hindi.
